

APPLICATIONS INFORMATION SHEET

Belt section	BX	
Length	1250	mm
Quantity	2	
DriveR motor Type	Diesel	
Power rating		kW
DriveR speed	Var.	rpm
Pulley Diameter		
DriveR	200	mm
DriveN	90	mm
Shaft Separation (Cnom)		mm

Description of Application:

Agricultural applications are especially hard on V-belts. Belts are exposed to shocking loads, machinery often has not tensioning provisions and the machinery is operated 24 hours a day. Belt failures are critical. Machinery downtime adversely affects operations and profits.

The VOLTA Power Edge:

VOLTA Power V-belts are constructed to withstand variable loads. The design of the belt and the materials used ensure maximum life and efficiency under a wide range of operating conditions.
