

APPLICATIONS INFORMATION SHEET

Belt section	XPA	
Length	1700	mm
Quantity	6	
DriveR motor Type	Electric	
Power rating	37	kW
DriverR speed	2955	rpm
Pulley Diameter		
DriveR	269	mm
DriveN	112	mm
Shaft Separation (Cnom)	545	mm

Description of Application:

The air compressor is in continuous operation (24 hours a day, 7 days a week). The load on the motor, and therefore on the belts, varies with the operation of the compressor. This causes shock loads on the belts at varying intervals. The compressor utilizes 6 belts in a set to provide the correct transfer of power from the motor to the compressor.

The VOLTA Power Edge:

The patented production process used by VOLTA Power provides belts with the tightest length tolerance on the market. This makes the purchase of matched sets of belts unnecessary. VOLTA Power V-belts provide long reliable operating life even under conditions of varying loads.
