

APPLICATIONS INFORMATION SHEET

Belt section	C	
Length	4096	mm
Quantity	8	
DriveR motor Type	Electric	
Power rating	75	kW
DriveR speed	1455	rpm
Pulley Diameter		
DriveR	350	mm
DriveN	420	mm
Shaft Separation (Cnom)	1450	mm

Description of Application:

The refrigeration plant of a large food processing facility requires long life, dependability and cleanliness from a V-belt. Machinery operates round-the-clock and must maintain maximum efficiency. In addition cleanliness in food processing facilities is a primary concern.

The VOLTA Power Edge:

VOLTA Power V-belts are manufactured from Thermoplastic Elastomers. This material does not leave residues or material dust in the vicinity of the machinery. The computerized production of belts ensures that the actual length of all belts agrees with the length printed on the belt to within $\pm 0.10\%$.
