

APPLICATIONS INFORMATION SHEET

Belt section	BX	
Length	4318	mm
Quantity	8	
DriveR motor Type		
Power rating	90	kW
DriverR speed	1460	rpm
Pulley Diameter		
DriveR	260	mm
DriveN	280	mm
Shaft Separation (Cnom)	1650	mm

Description of Application:

The application is out of doors exposed to extremes of temperature, direct sunlight, rain and dust. The machinery operates continuously. This stonecrusher is the second machine in the process. Any failure will halt all work down line. The stonecrusher operates with a set of 8 belts. This requires that belts be purchased as sets.

The VOLTA Power Edge:

VOLTA Power drive belts are manufactured from TP-Rubbers that exhibit an excellent resistance to moisture and dust. They are also highly resistant to the sun's UV rays. VOLTA Power revolutionary manufacturing process maintains extremely tight belt length tolerances between production runs. This eliminates the necessity of purchasing belts as matched sets.
