

## APPLICATIONS INFORMATION SHEET

Belt section	<b>BX RECMF</b>	
Length	<b>6543</b>	mm
Quantity	<b>6</b>	
DriveR motor Type	<b>Electric</b>	
Power rating	<b>55</b>	HP
DriverR speed	<b>749</b>	rpm
Pulley Diameter		
DriveR	<b>180</b>	mm
DriveN	<b>1160</b>	mm
Shaft Separation (Cnom)	<b>1840</b>	mm

### Description of Application:

Wellhead pumps operate in isolated regions and are typically mounted as belt sets. They must function out of doors in all types of climate, including dusty and rainy conditions. Long life and reliability are key features in selecting belts for this type of application.

### The VOLTA Power Edge:

The computerized manufacturing process patented by VOLTA Power reduces length tolerances to the point that there is no need to purchase belt sets. Individual belts can be combined into a set and used without any loss of efficiency.

VOLTA Power belts have excellent resistance to varying environmental conditions. They are resistant to moisture, dust and the sun's UV radiation.
