

➔ **Application :**

The Storeveyor is a storage system commonly used for cereals and snack foods and also for wet, greasy products such as pet food, where it would be difficult or impossible to extract them if stored in traditional storage silos.

This system is designed to receive and discharge the product by following the FIFO (First In, First Out) logic ensuring a high level of hygiene, safety and careful transportation.

➔ **Challenge:**

Expensive and difficult cleaning process of original Modular and Friction driven belts.

➔ **Solution:**

Volta FHB-4-SD and FHB-6-SD belts.

➔ **Result:**

- Reduced cleaning time;
- No loss of cereals and snacks between belt slots;
- No fraying;
- Improved product quality.
